

Navigating Breast Cancer Clinical Trials

Patient-friendly Resources

Cancer.net: Finding a Clinical Trial is an online tool to help patients find a research opportunity that might be appropriate for their needs.

<https://www.cancer.net/research-and-advocacy/clinical-trials/finding-clinical-trial>

PRE-ACT (Preparatory Education About Clinical Trials) is an educational program designed to provide general information about clinical trials through a series of short videos.

<https://www.cancer.net/research-and-advocacy/clinical-trials/welcome-pre-act>

BreastCancerTrials.org is a non-profit service that encourages individuals affected by breast cancer to consider clinical trials as a routine option for care and helps individuals who are interested in breast cancer research find studies that are right for them.

<https://www.breastcancertrials.org/BCTIncludes/index.html>

Breastcancer.org: Metastatic Breast Cancer Trial Search is a search tool that uses patient-specific information to identify clinical trials that might be right for them.

<https://www.breastcancer.org/metastatic-trials-tool>

Metastatic Trial Talk is carefully selected news and features about metastatic breast cancer clinical trials, research, and treatment options for patients to share and discuss with your doctor.
